

SPORTING REGULATIONS

*Eupen Championship Series #ECS*Tuesday Club · Experience Factory Eupen · Version 05.10.26

Art. 1 – Introduction

The Eupen Championship Series (#ECS) is the championship of the Tuesday Club, organised by Experience Factory Eupen. Every Tuesday evening, drivers compete in sprints, split into two categories, Performance and Challenger, and every quarter ends with a Grande Finale. Mutual respect and sportsmanship are the keywords of this championship.

These regulations make sure the races are run in excellent conditions throughout the competition, with the highest possible equality of chances for every driver! However, keep in mind that good luck and bad luck are part of motorsport!

Art. 2 – General information

- 2.1 Organisation: EXPERIENCE FACTORY EUPEN
Industriestrasse 37
4700 Eupen
BELGIUM
Tel.: +32 87 31.32.33
WhatsApp: +32 477 31.32.33
E-mail: eupen@experience-factory.com
- 2.2 Circuit: EXPERIENCE FACTORY EUPEN
- 2.3 Karts: Sodikart SR4 – gHP – Oct 2024
- 2.4 Race director: Jordan REMELS

Art. 3 – Regulations

- 3.1 Official language
These regulations were drafted in French. Only the French version is binding in case of controversial interpretation. Versions in other languages are provided for your convenience only.
- 3.2 Everything that is allowed is written in these regulations; everything else is forbidden.
- 3.3 Through your participation in this event, you accept:
- These sporting regulations
 - The general rules of Experience Factory Eupen
 - The authority of the race director on duty
- 3.4 The goal of these regulations is to ensure perfectly sportsmanlike behaviour during all races and a maximum equality of chances.

The race director may make changes to these regulations as long as these basic principles are respected.

Art. 4 – Admission conditions

4.1 Every driver who takes part in a race needs to have at least a Gold licence. More info on our website: www.experience-factory.com

4.2 Participation is forbidden for:

- Light persons who have no experience driving a weighted kart
- Persons with anaemia, heart, lung or back problems
- Persons who unexpectedly lost consciousness in the last 5 years
- Pregnant women
- Persons with more than 5 mg/100 millilitres of alcohol in their blood
- Persons under the influence of drugs

Art. 5 – Racing equipment

5.1 General equipment instructions

- Every driver must wear a helmet with visor. The helmet must be closed.
- It is forbidden to wear a scarf or any other loose clothing that may hang out of the kart.
- Long hair must be tucked inside the helmet or the clothing.
- It is forbidden to wear open shoes and/or shoes with heels.

5.2 We recommend drivers to wear the following equipment:

- Gloves
- Rib protector
- Neck protector

Art. 6 – The races

6.1 Season and quarters

The season is split into 4 quarters. Each quarter consists of 12 regular Tuesdays, followed by a 13th Tuesday dedicated to the Grande Finale (see art. 16).

6.2 Schedule

Every driver takes part in 3 sprints per Tuesday. The first training session starts at 7:20 pm. Current schedule:

- 7:00 pm: Admin
 - 7:20 pm: Training 1 (18 min)
 - 7:45 pm: Sprint 1
 - 8:05 pm: Sprint 2
 - 8:25 pm: Sprint 3
 - 8:45 pm: Sprint 4 (with more than 20 drivers or at the race director's decision)
 - 9:10 pm: Training 2 (18 min)
- Every sprint stands alone and lets you score points.

6.3 Entry fee

Taking part in a Tuesday costs €65 per driver. Taking part in the Grande Finale is free of charge for qualified drivers.

- 6.4 Sprint procedure
Every sprint runs as follows:
- Partial in-lap stopped by a red flag (the flashing lights are on, and the place where the red flag is shown depends on the race direction)
 - 1 qualifying lap
 - 12 race laps: drivers line up in the order of their qualifying position. There is no safety kart anymore: drivers come to a standstill, then the leading driver sets a walking pace before being allowed to accelerate from a defined point. The race starts when each kart passes the green flag (the timing loop is authoritative).
Every race has its own direction, number of pit-stops, short-cuts, Joker Laps, etc. The race formula will be announced at the latest during registration.
- 6.5 Pit-stop
- You enter the pit lane in a controlled way at a moment of your choice.
 - Our software automatically detects that you are in the pit and measures how long you stay there.
 - Near the pit exit, you will find a screen with the following information:
 - Your kart number
 - Your name
 - The time spent in the pit (counting up)
 - Excessive or dangerous speed in the pit lane is strictly forbidden. There is nothing to gain from it!
 - You may go back on track once the required minimum pit-stop time has been reached.
 - You may leave the pit before the driver who entered ahead of you, but you may never block or delay their exit! If you both want to leave at the same time, the driver who entered the pit first has priority, even if you are ahead of them!
 - Blocking the pit exit for other drivers is strictly forbidden! Drivers who enter the pit because of a mechanical or other problem must go directly to the dedicated red zone (close to the scale). From there, it is impossible to block or delay the exit of other drivers.
 - Drivers leaving the pit and rejoining the track never have priority.
You may never make a pit-stop during the last lap of the race.
- 6.6 Short-cut
There are 2 places on the circuit where you can take a short-cut. You can use it:
- At a moment of your choice, when a specific number of short-cuts is imposed
 - As much as possible while the short-cut is open
- Drivers taking their short-cut never have priority.
- 6.7 Joker Lap
There is one place on the circuit where you can take a Joker Lap (an additional loop). You can choose when to take your Joker Lap(s) when a number of Joker Laps is imposed.
- 6.8 Race finish
The race is finished when the leader has completed 12 laps. The number of laps completed is visible on track for all drivers. The planned maximum duration of each race is 13 minutes; this is only an indication and has no official value.
- 6.9 Computer problem
If 75 % of the race has been completed (9 laps), the standings at the moment of the timing problem are final.
If less than 75 % of the race has been completed, the race is restarted based on the qualifying results.

Art. 7 – Categories

- 7.1 Driver categories
There are two driver categories:
- **Performance**
 - **Challenger**

Both categories race together on Tuesdays and at the Grande Finale. Each category has its own quarterly standings.

- 7.2 **Starting category**
At the launch of the championship, every driver with at least 3 podiums in the Tuesday sprints in 2025 and 2026 starts in the "Performance" category. The complete list of these drivers is drawn up by the organisation and published before the first Tuesday.
All other drivers, including new drivers, start in the "Challenger" category.
- 7.3 **Promotion to Performance**
A Challenger driver who wins the Challenger standings of a quarter (art. 16.5) is ranked "Performance" from the next quarter.
- 7.4 **Back to Challenger**
A Performance driver who does not finish on the podium in any of their last 21 sprints moves down to the "Challenger" category from the next quarter.
- 7.5 **Automatic promotion and race director's decision**
A driver who is not ranked "Performance" and who scores 3 podiums in their first 12 sprints as from 6 October 2026 is automatically promoted to the "Performance" category, with immediate effect: from the next Tuesday, they appear in the Performance standings of the current quarter, with all the results already obtained.
The race direction reserves the right to move a driver to another category for obvious reasons of sporting fairness.

Art. 8 – Weight

- 8.1 **Minimum weight**
Every driver races with a minimum weight of 85 kg (equipment and ballast included). If the race formula of the day provides for it, the minimum weight can be set at 95 kg. Every driver must weigh at least this weight at all times. The control takes place after every race!
- 8.2 **How to add ballast to your kart**
Drivers who weigh less than the minimum weight (equipment included) have two ways to add ballast to their kart:
- You can put weights (which are at your disposal) in the dedicated slots in the side pod of the kart. We have weights of 2.5 kg, 5 kg and 10 kg. You can use a maximum of 30 kg.
- You can use your own ballast. It must be in one piece and be attached to your kart if it weighs more than 10 kg.
- 8.3 **Weight control**
All drivers must report to the scale on their own initiative DIRECTLY after the race, or they will receive a one-lap penalty.

Art. 9 – The karts

- 9.1 **Type of karts**
Pro Karts: Sodikart SR4 – 9HP (10/2024)
- 9.2 **Changes to the karts**
Spare parts, lubricants and any kind of work on the kart, including tyre pressure adjustments, are forbidden for drivers and any member of their team. No technical, chemical or tyre enhancement is allowed.

Art. 10 – Kart draw

- 10.1 To avoid any loss of time, a transparent draw is made for all races just before the start.
- 10.2 Every driver races with 3 different karts.

Art. 11 – Kart change

- 11.1 What justifies a kart change?
There is a very simple rule: if the mechanic or the race director decides that it is impossible to finish the next race with the kart, it is considered eligible for a change! If your kart has smaller problems (cracks in the seat, etc.), you will most likely have to keep driving it.
Please take into account that our mechanics are no fortune-tellers and can make mistakes.
- 11.2 Kart change during qualifying for lack of performance
If your lap times are much slower than usual but you cannot tell why, you may change karts, but you will start last and receive a one-lap penalty for the race.
- 11.3 Kart change during qualifying
If you think you have a valid problem (see point 11.1), you can ask a mechanic to investigate after qualifying. If the mechanic confirms the problem, you will get a new but cold kart; you can however keep the position you reached with the first kart.
The race director may also test the kart personally and judge whether the request for a kart change is valid or not.
- 11.4 Kart change during the race for lack of performance
If your lap times are much slower than usual but you cannot tell why, you may change karts, but you will receive a two-lap penalty for the race.
- 11.5 Kart change during the race
If you think you have a valid problem (see point 11.1) during the race, you can enter the pit and go to the dedicated kart-change area.
You can ask a mechanic or the race director to investigate. If one of them confirms the problem, you will get a new but cold kart.
Don't panic, please stay 60 sec or 120 sec in the pit! You will receive 1 or 2 bonus laps to compensate the time lost! You will only lose a few seconds.
- 11.6 The race direction and the marshals monitor the lap times! A check is possible between 2 races:
1° if the problem is not severe and the kart can keep running, it stays in the race;
2° if the problem is severe but can be repaired within 5 minutes, the next race starts once the repair is done;
3° if the problem is severe and cannot be repaired within 5 minutes, another kart is used and warmed up for 3 laps. The race direction informs all participants of this change.
- 11.7 Don't forget: championships are won by getting the most out of every kart, not by complaining that you did not always have the best kart!

Art. 12 – The flags

FLAGS FOR SAFETY

- 12.1 Local yellow flag
A local yellow flag may be shown on a specific section of the circuit. It means there is an incident ahead: marshals and/or drivers on the track, a stopped kart or anything else that requires your attention. Be prepared to slow down and assess the situation. Depending on the situation, we expect you to act carefully and responsibly.

If the race direction judges the situation dangerous and you decide not to slow down (we can see this in your lap times), you will receive a penalty. We advise you to take these situations seriously!

Overtaking a moving kart is not allowed, even if it is very slow. Stopped karts may be overtaken.

12.2 Red flag

When we have to stop the race (track repairs, accidents on track...), we use the red flag. An immediate stop is mandatory! If possible, we stop the race in front of the driver in first position. The race restarts according to the start procedure described in art. 6.4.

FLAGS FOR RACE CONTROL

12.3 When does a driver get a blue flag?

During the race, blue flags are shown to let through drivers who have a higher position and are clearly faster. Even if you are faster than a driver in a higher position than yours, you will not get a blue flag!

There will be no blue flag for a driver in a higher position if that driver is clearly slower than the driver ahead in a lower position.

12.4 Fixed blue flag

Fast drivers in a higher position are approaching from behind. Giving way is not yet required!

12.5 Waved blue flag

The driver who receives this flag must give way within the next 3 corners to the faster drivers in a higher position in the race. In some situations it takes more than 3 corners to let the faster driver through: this is judged by the race direction. However, you risk a penalty.

12.6 White flag

The marshal indicates that you are starting the last lap of the race.

12.7 Chequered flag

It indicates the end of the race. It is always given on the finish line!

FLAGS FOR UNSPORTSMANLIKE BEHAVIOUR

12.8 These flags are used to penalise unsportsmanlike behaviour or other mistakes directly on track! Mistakes are human and can happen! If you make a mistake, admit it and put it right yourself, this will be highly appreciated! If you don't, you will receive a warning flag, an orange flag or a black flag!

12.9 Number of mistakes allowed

1 flag = 1 mistake. You are allowed a maximum of 2 mistakes per sprint. If you exceed this number, you will receive a black flag.

12.10 Warning flag

This diagonal black and white flag is a warning, no more, no less! However, your behaviour will be monitored by the race direction.

12.11 Orange flag

Your overtaking manoeuvre was not sporting enough. You must give the position back to the driver you overtook, even if this makes you lose several positions. If this takes more than one lap, you will receive a black flag.

You may not make your pit-stops, short-cuts or Joker Laps before giving the position back. If you do, you will receive a penalty.

- 12.12 Black flag
This is a time penalty. You must enter the pit! If it takes you more than one lap to enter the pit, you will be disqualified from the race.
If no race direction is present, you must stay at least 15 seconds in the pit; afterwards you may go back on track while respecting the priority rules!
If a race director is present, the race director may decide, at their discretion, to:
- Keep you in the pit for more than 15 seconds
 - Disqualify you from the race
 - Disqualify you from the event

Art. 13 – Behaviour of drivers & entourage

- 13.1 Position protection
Deliberately protecting your position is allowed during the last 2 laps of the race. If a driver protects their position during the first 10 laps, they will receive one warning per defended corner.
- 13.2 Race direction
Directly after the race, the race direction determines the final and definitive results.
Once a penalty has been given, the race direction will never withdraw it. No video or eyewitness can change this decision!
As long as the conversation stays respectful, you are welcome to ask questions.
Every discussion has an end, and it ends when the race director leaves the room. There is no point repeating your problems and/or complaints over and over again.
Disrespectful or violent behaviour towards the race direction will lead to a disqualification from the event!
- 13.3 Entourage
The drivers' entourage must also behave respectfully at all times. If not, they risk being denied access to the circuit for the duration of the event.

Art. 14 – Penalties

ON TRACK	PENALTY
14.1 Pushing without advantage	Warning
14.2 Bad "non-violent" overtaking	Orange
14.3 Bad "violent" overtaking	Black
14.4 Overtaking during the formation lap	Black
14.5 Overtaking under a yellow flag	Black
14.6 Not respecting the speed limit under a yellow flag	Black
14.7 Deliberately ignoring the orange flag after one lap	Black
14.8 Deliberately ignoring the blue flag within 3 corners	Warning
14.9 Deliberately ignoring the blue flag within one lap	Black
14.10 Deliberately ignoring the black flag	Disqualification
14.11 One short-cut too many	1 lap penalty
14.12 One Joker Lap too few	1 lap penalty
14.13 Deliberately crashing a kart	Disqualification
14.14 Position protection in the first 10 laps (per defended corner)	Warning

General remark: not respecting the race formula of the day (direction, number of pit-stops, short-cuts, Joker Laps, minimum weight...) is penalised with a one-lap penalty.

IN THE PIT	PENALTY
14.15 Pit-stop too short (0.01 to 1 second)	5 seconds
14.16 Pit-stop too short (more than 1 second)	1 lap penalty
14.17 Speeding in the pit before the start of the pit timing	Warning
14.18 Speeding in the pit lane	Warning
14.19 Not respecting pit priority rules and delaying a driver	Warning
14.20 Blocking other karts at the pit exit	Disqualification
14.21 Dangerous pit exit	Warning
14.22 Entering the pit in the wrong direction	Black
14.23 One pit-stop too few	1 lap penalty
14.24 Pit-stop during the last lap	1 lap penalty
14.25 Underweight during the race, 85 or 95 kg (0 to 0.5 kg)	10 seconds
14.26 Underweight during the race (more than 0.5 kg)	1 lap penalty
14.27 Weights forgotten in the kart – 1st time	Notification
14.28 Weights forgotten in the kart – 2nd time and after	Warning
14.29 Work on the kart by the driver – 1st time	Warning
14.30 Work on the kart by the driver – 2nd time and after	Disqualification

OFF TRACK	PENALTY
14.31 Disrespectful and/or violent behaviour of a driver	Disqualification
14.32 Disrespectful and/or violent behaviour of a driver's entourage	Access denied

Art. 15 – Point distribution

15.1 Every sprint counts as one result. After each sprint, points are awarded according to the position in the overall classification, using the following table:

POS	POINTS
1	31
2	29
3	28
4	27
5	26
6	25
7	24
8	23
9	22
10	21
11	20
12	19
13	18
14	17
15	16
...	-
Race DQ	0

POS	POINTS
16	15
17	14
18	13
19	12
20	11
21	10
22	9
23	8
24	7
25	6
26	5
27	4
28	3
29	2
30	1

Pole Pos.	1 extra point
Fastest lap (excl. Shortcut)	1 extra point
Bonus	1 extra point

- 15.2 Bonus
In every race, one bonus point can be won depending on the race formula (e.g. fastest pit-stop, fastest short-cut...).
- 15.3 Quarterly standings
Only the **best 15 results** count for Performance drivers, and the **best 12 results** for Challenger drivers, minus any handicap (art. 15.5).
- 15.4 In case of a tie, the number of wins, second places, third places... is used to separate the drivers.
- 15.5 Performance podium handicap
The top three of the Performance standings of a quarter receive the following handicap in the next quarter:
- 1st: -50 points
 - 2nd: -25 points
 - 3rd: -5 points

Art. 16 – The Grande Finale

- 16.1 Date
The Grande Finale takes place on the 13th Tuesday of each quarter. It is free of charge for qualified drivers.
- 16.2 Qualification
The **top 14 Performance drivers** and the **top 10 Challenger drivers** of their quarterly standings (art. 15.3) qualify, provided they took part in at least **5 Tuesdays** of the quarter for Performance drivers and **4 Tuesdays** for Challenger drivers.
- 16.3 Format
The Grande Finale consists of a Superpole followed by a final race with the 24 qualified drivers, Performance and Challenger together. The Superpole format is announced by the race direction.
- 16.4 Superpole and final race points
The same points table applies to the Superpole and to the final race:

POS	POINTS
1	50
2	40
3	32
4	26
5	22
6	19
7	16
8	14
9	12
10	11

POS	POINTS
11	10
12	9
13	8
14	7
15	6
16	5
17	4
18	3
19	2
20	1

- 16.5 Final standings of the quarter
The Superpole and final race points are added to the best 15 (Performance) or 12 (Challenger) results of the quarter. The driver with the most points in their category wins the quarter.

Art. 17 – Awards & prizes

- 17.1 There is no podium or prize for every single sprint. After each Grande Finale, a podium is established in each category based on the final standings of the quarter (art. 16.5).
- 17.2 Performance podium
- 1st: entry to the KWC final
 - 2nd: entry to the next BNC
 - 3rd: entry to the ERW
- 17.3 Challenger podium
- 1st: 2 Bronze grandstand tickets for a Formula 1 Grand Prix
 - 2nd: 2 tickets for the 24 Hours of Spa
 - 3rd: prize announced before the Grande Finale

- 17.4 Some costs remain the driver's responsibility:
- Licence cost
 - Rental of FIA-homologated driver equipment if needed
 - Transport: home – race venue
 - Accommodation on site if needed

Art. 18 – Points for the SWS ranking

- 18.1 All participants must have an SWS account!
